

SRINIVASA YADAV

Flutter Developer | Mobile Application Development

Phone: +91 9482281701 | Bengaluru, Karnataka | Email: srinivasa.yadav.b@gmail.com

LinkedIn: [linkedin.com/in/srinivasa-yadav](https://www.linkedin.com/in/srinivasa-yadav) | GitHub: github.com/srinivasa-dev | Portfolio: srinivasa.dev

PROFESSIONAL SUMMARY

Flutter Developer with 6+ years of experience building high-performance mobile applications with Flutter and Dart. Skilled in clean architecture, REST APIs, Firebase, UI/UX, CI/CD, application modernization, and end-to-end release management. Delivered up to 3x faster performance, approximately 33% smaller app size, 83%-to-99% bug-free quality, and measurable gains in reliability and engagement.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Firebase, REST APIs, Clean Architecture, UI/UX, User Interface Design, Performance Optimization

Languages and Web: TypeScript, JavaScript, HTML, CSS, Bootstrap, SQL, JSON

Backend and Cloud: Node.js, MySQL, Cloudflare Workers

Tools and Practices: Git, CI/CD, Agile Application Development, Application Modernization, Generative AI, Debugging, Release Management

PROFESSIONAL EXPERIENCE

Cloud Front-end Engineer | NexTurn

December 2024 - Present

- Led a high-impact Flutter performance initiative that made the application run up to 3x faster and reduced app size by approximately 33%, materially improving responsiveness and delivery efficiency.
- Define scalable Flutter architecture and state-management patterns using Bloc, Provider, and GetX; establish architecture standards, lead code reviews, mentor engineers, and contribute to smaller-scale Node.js and TypeScript backend services.
- Built AI-powered internal engineering tools with Generative AI to automate development workflows and accelerate application modernization.

Software Engineer | ChefKart

May 2024 - December 2024

- Owned end-to-end development, deployment, and release management of the partner-side Flutter application, raising its bug-free rate from 83% to 99% through systematic debugging, defect resolution, and release-quality improvements.
- Resolved 90% of reported issues within 24 hours, improving development cycles and release stability.
- Optimized application performance, achieving a 40% reduction in load times and a 20% increase in user engagement.
- Translated Figma designs into pixel-accurate Flutter interfaces and partnered with QA to stabilize partner workflows across releases.

Associate Software Engineer | A.P. Moller - Maersk

July 2022 - January 2023

- Delivered high-performance Flutter mobile applications with 30% faster load speed, applying Agile practices and cross-functional collaboration to improve user experience and accelerate delivery.
- Applied user-interface design and Agile application-development practices to deliver maintainable Flutter features in a cross-functional environment.

Software Engineer | 1985 Web Solutions

September 2020 - February 2022

- Built and maintained Flutter mobile and web applications using JavaScript, REST APIs, and modern UI practices; collaborated with senior developers and project stakeholders on complex corporate-client projects to deliver user-friendly solutions.
- Contributed to large, complex design projects for corporate clients, translating requirements into maintainable mobile interfaces and supporting delivery through implementation and testing.

Project Trainee | ISRO Satellite Centre

January 2020 - April 2020

- Developed a thermal-management project for satellites by constructing a website and managing its database using JavaScript and database tools.
- Applied frontend and database concepts to organize thermal-management data in a practical software solution.

EDUCATION

BTech in Information Science and Engineering | Vemana Institute of Technology, Bengaluru | 2016-2020
